OEW Installation Instructions
Revised 07.05.2006
========================================

Pre-installation for a StandAlone System

========================================

1.0     Review the System Requirements for Hardware and Software compatibility.

                Processor:              Intel Pentium III

                Speed:                  700MHz or higher

                RAM:                    512 MB

                Hard Drive:             20 GB

                Free Disk Space:        1 GB

                Sound Card:             Sound Blaster Compatible

                Video Card:             Support 1024x768 resolution & 16-bit color

                E-mail:                 Required

                Internet Access:        High Speed Connection Required

                OS Software:            Windows 2000 or XP

                **Note:                 .NET Framework 1.1 is required

                To confirm .NET Framework 1.1 is installed choose
                Start > Control Panel > Add or Remove Programs.  Once the list
                of programs populates, look for "Microsoft .NET Framework 1.1"

                If .NET Framework 1.1 is not installed, you should download it
                via the Microsoft updates website below under "Custom."

                Do Not download and install .NET Framework 2.0 or higher
                before installing .NET Framework 1.1.

                http://update.microsoft.com/windowsupdate

2.0     Collect the following information which will be required during the install:

        Username:               <first initial> <last name> of the OEW user

        E-mail Address:         Can be the OEW user or a main company address

        **Note:                 E-mail is used for transmitting Elevations.

3.0     Download the OEW set up file.  Click on the link below or open a Web browser
        and copy the address to the web browser address bar and click enter.  This
        should start the download process.  When prompted, choose Save and locate
        the file on the Desktop.
